

Experiment No. 2

Title:

Create a scenario in WordPress for Social Marketing, Search engine and Sharing Tools.

Objective:

To learn Software as service (SaaS) using Free trial of WordPress

Tools used:

Internet , WordPress

Prerequisite:

Understanding of Software as service in Service model of cloud computing

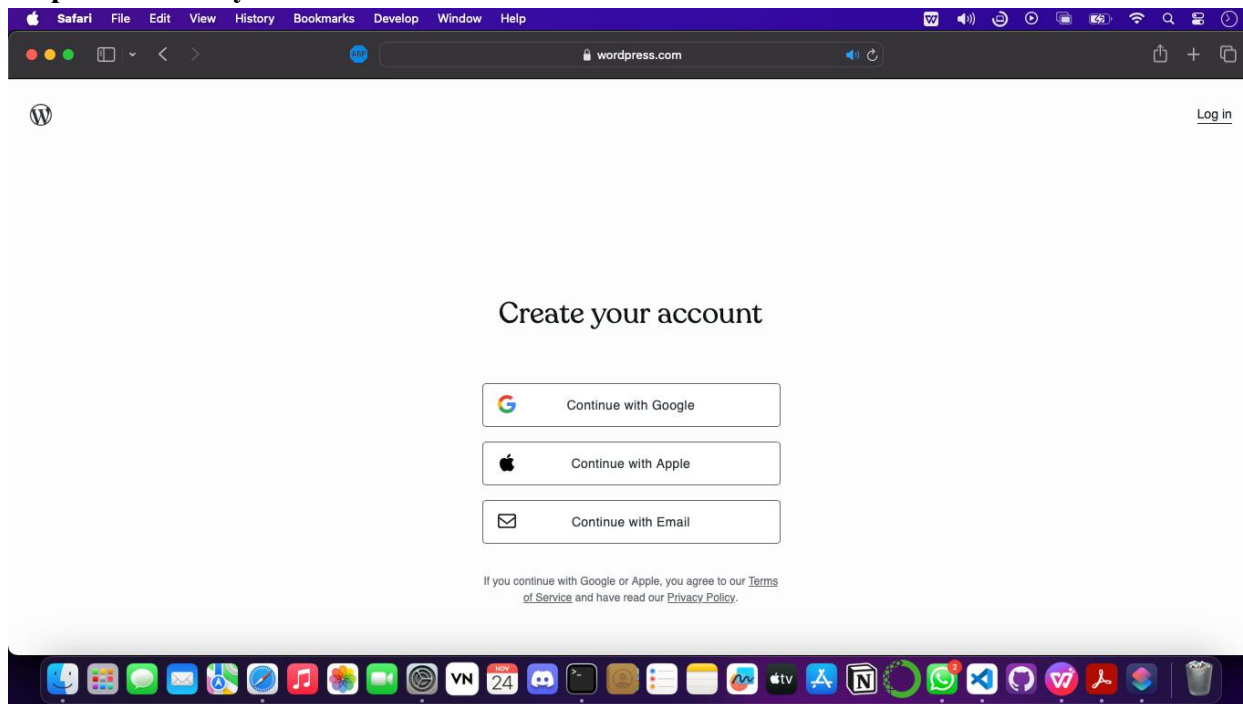

Theory:

WordPress started in 2003 when Mike Little and Matt Mullenweg created a fork of [b2/cafeblog](#). The need for an elegant, well-architected personal publishing system was clear even then. Today, WordPress is built on PHP and MySQL, and licensed under the GPLv2. It is also the platform of choice for over 43% of all sites across the web.

The WordPress open source project has evolved in progressive ways over time—supported by skilled, enthusiastic developers, designers, scientists, bloggers, and more. WordPress provides the opportunity for anyone to create and share, from handcrafted personal anecdotes to world-changing movements.

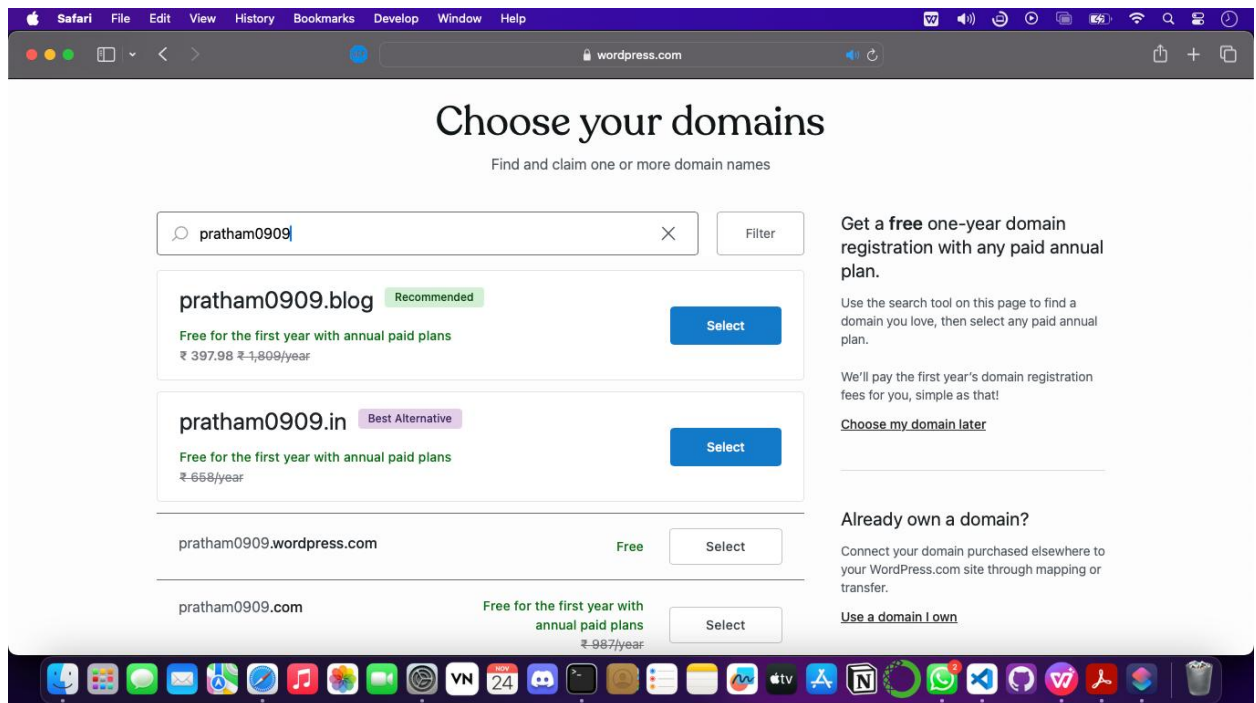

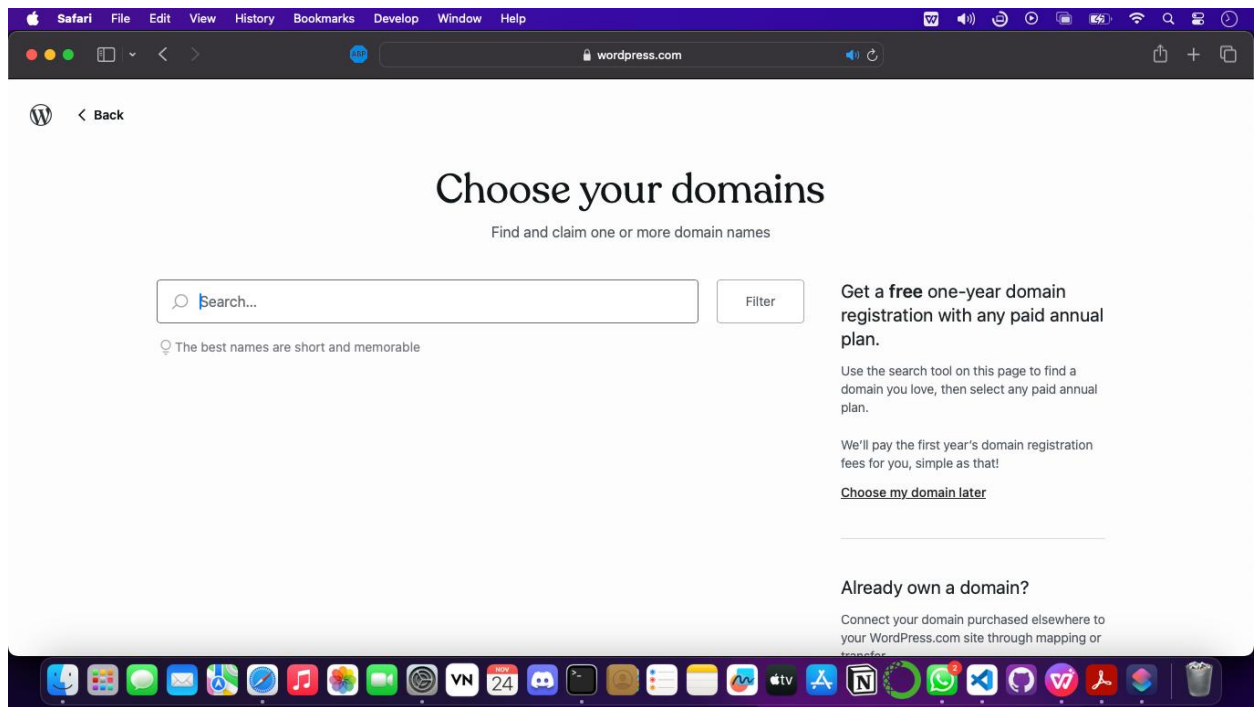

People with a limited tech experience can use it “out of the box”, and more tech-savvy folks can customize it in remarkable ways.

WordPress is a popular and widely used content management system (CMS) that allows users to create, manage, and publish content on the internet. It's an open-source platform, originally designed for blogging, but it has evolved into a versatile tool used for creating various types of websites, from simple blogs to complex e-commerce sites, portfolios, business websites, and more. It offers a user-friendly interface, a wide range of themes and plugins for customization, and doesn't require advanced technical knowledge to get started. Users can create and manage content, such as text, images, videos, and more, making it a flexible and accessible tool for building websites.

Step 3 – Choose Domain or you can choose later

What are your goals?

Tell us what would you like to accomplish with your website.

Select all that apply

☒ Write & Publish

☐ Sell online

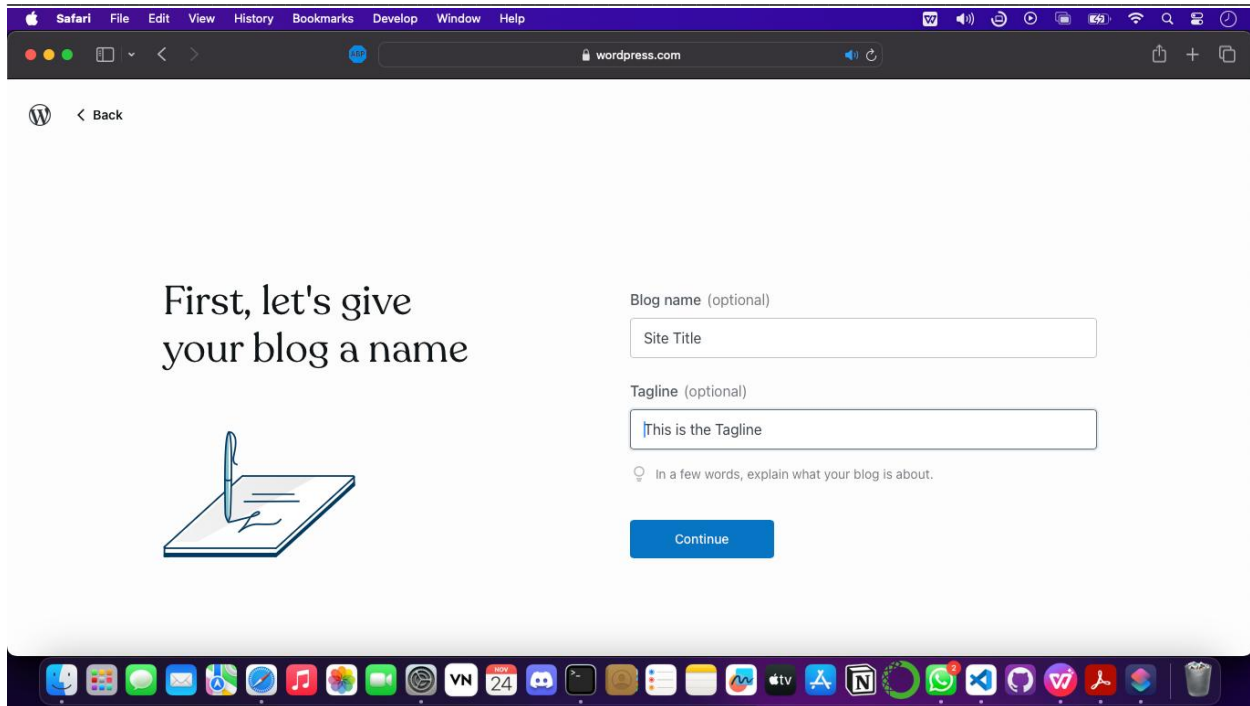

☐ Promote myself or business

☐ Get a website built quickly **Premium**

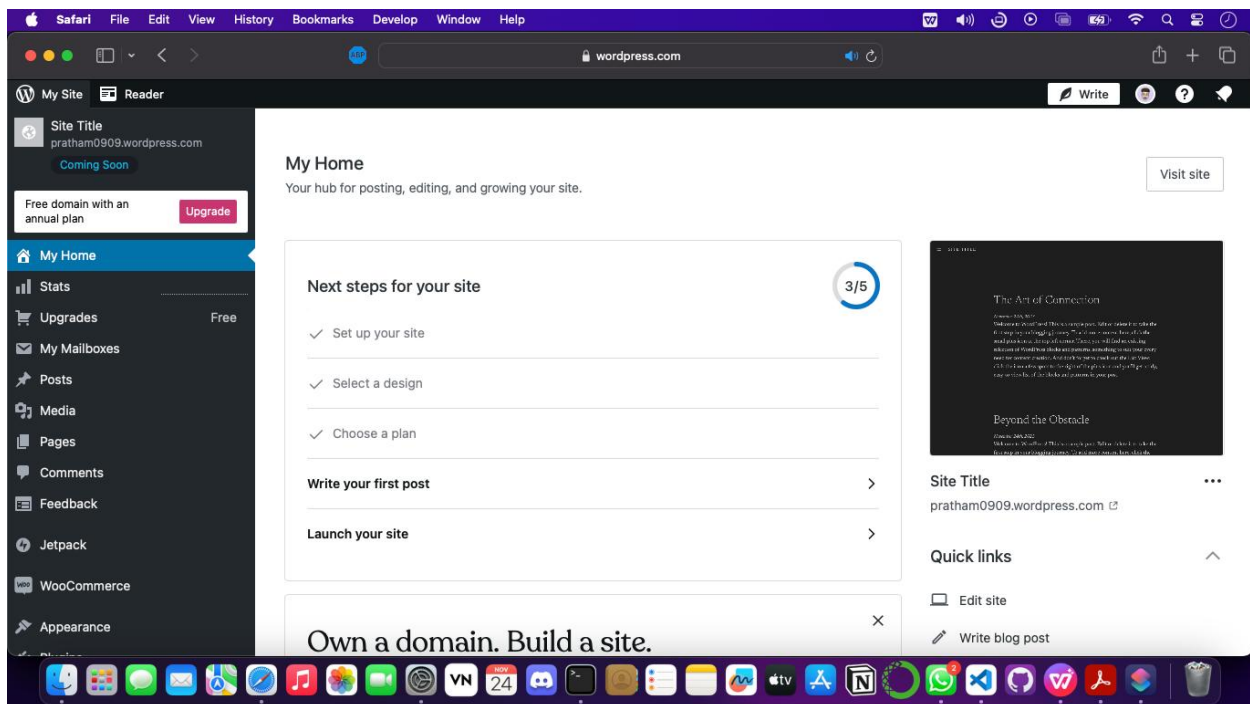

☐ Import my existing website content

☐ Other

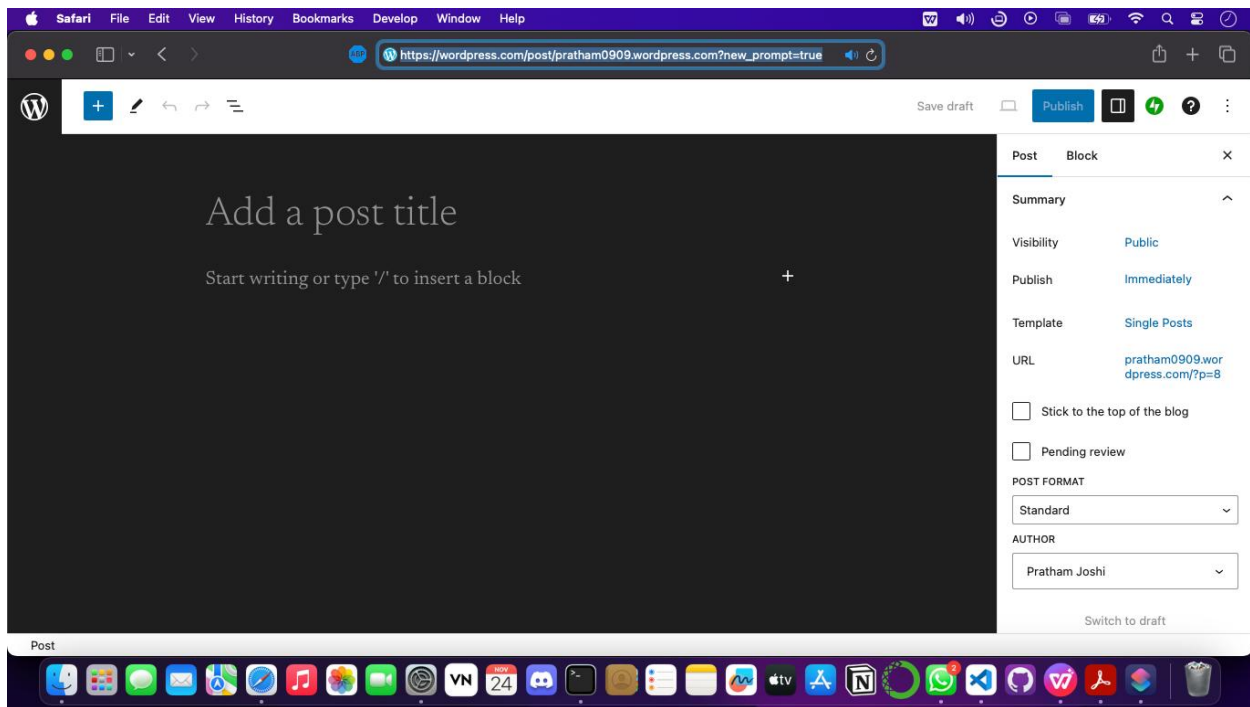

Continue

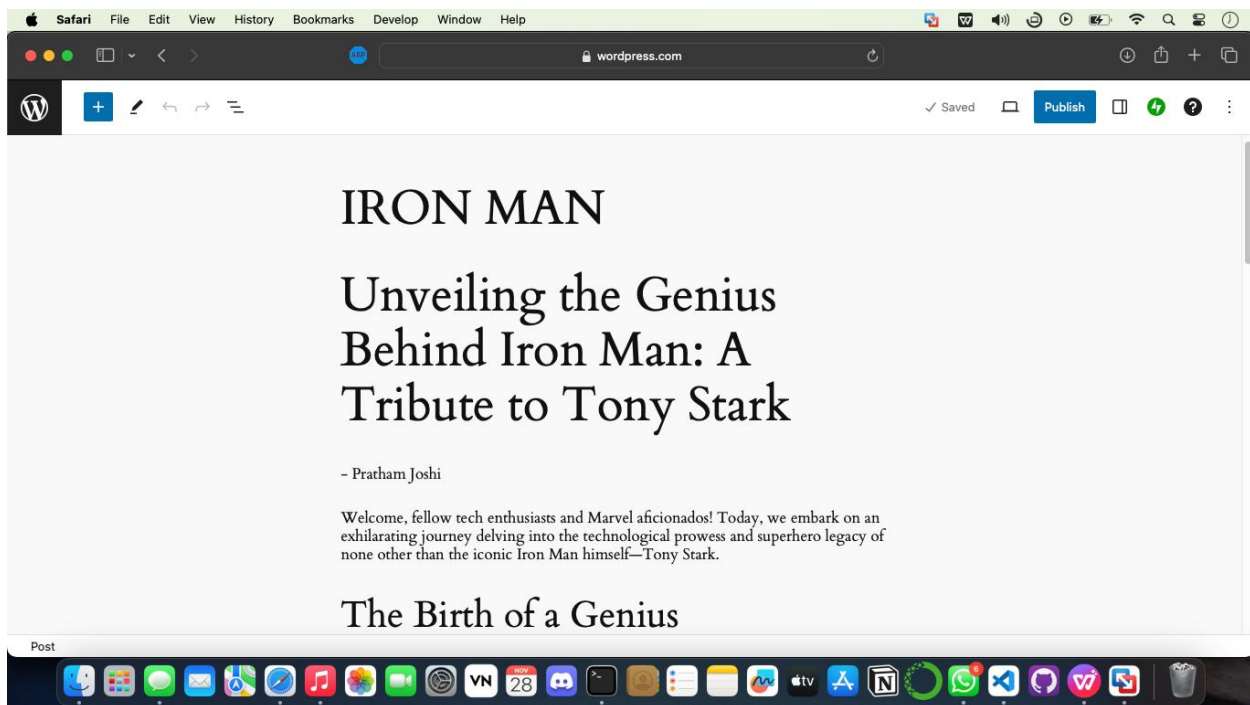

Step 7 – Successfully Account is created

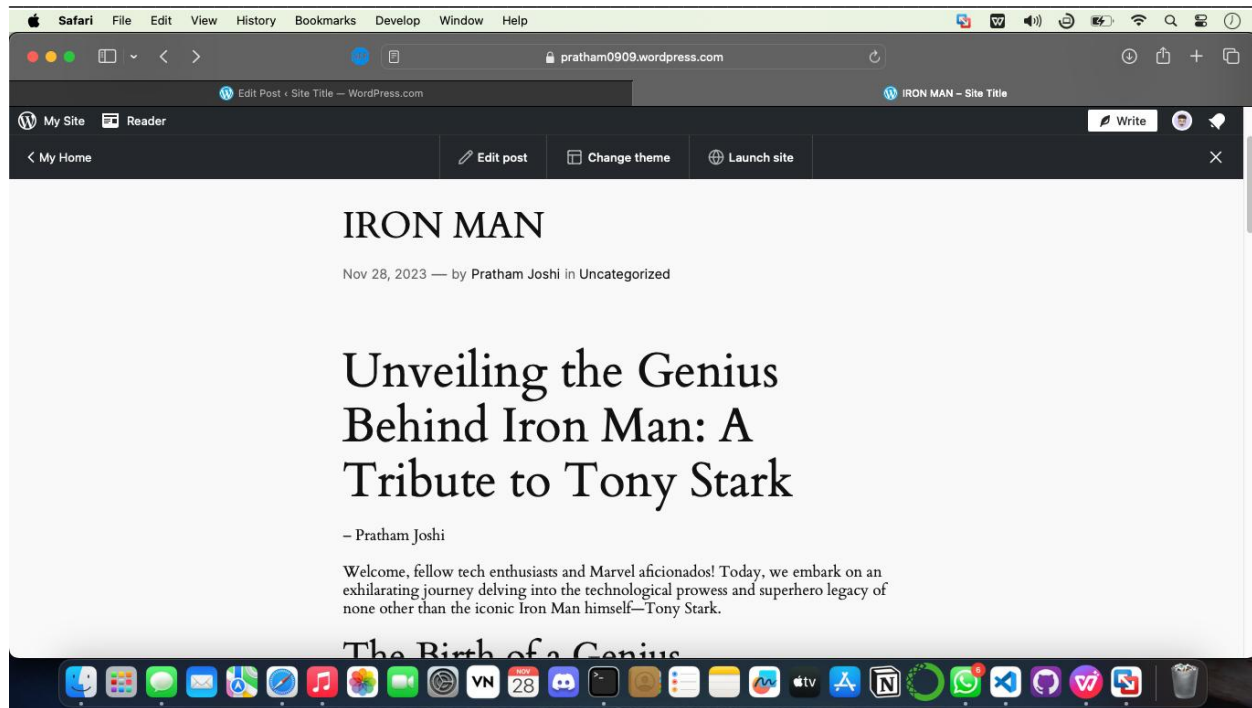

Step 8. – By clicking write you can start building your own website

Here onward we can build the website as per your preferences and there are some templates also which you can edit can make it your own website.
